

VISION – Paper Money Pulled from earth and begins to burn – Greg Lancaster June 5, 2008

I was going about my day in ministry work when all of a sudden I saw paper money (dollar bills) being sucked off the face of the earth. It was like there was a vacuum high in the sky and the paper money was being sucked up into this vacuum. Since the earth was so large and the vacuum area was so small it caused the money to look like the base of a mountain of paper money was coming from the earth where it peaked at this vacuum area in the sky as it was going up into it. It was like a large vacuum cleaner hose sucking it up. All of a sudden as the money was flapping it was being sucked up this “mountain of money” and it turned in to fire and began to burn. The money began to burn with large lapping flames and turned into a mountain of fire. The vision then ended.
